## Fraud Protection

With the holidays approaching its important to protect yourself from potential fraud. For instance, when making online purchases we suggest using your credit card instead of your debit. When using a debit card, you avoid interest fees but your debit card is linked directly to your checking account giving hackers access to your funds. It also makes disputes harder to resolve than it is with a credit card.

If you decide to use your credit or debit card online be sure to:

- Use a familiar website or brand.
- Check that the website is secure and encrypted.
- Don't shop on WiFi Hot Spots.
- Never provide your card information in an email.
- Monitor your account frequently.

Never miss out on any event or important notices by following us on Facebook, Twitter and Instagram!
